We are using this new blackcap as a premium so our customers can see what a wonderful berry this is. NOTE OFFER BELOW.

dition applies to all stock which takes two or more years to grow.

All fruit sold for ceiling prices this year; for instance, Strawberries brought \$5.67 for a 16-quart case, Red Raspberries \$5.85 for a 24-pint case, Black Raspberries \$4.36 per 24-pint case, Blueberries \$6.00 for a 16-pint crate. Even Peaches, with the largest crop in history, brought from \$2.00 to \$3.65 per bushel. We truthfully believe fruit will continue to command these high prices for a good many years to come. It is a proven fact you can make more money from one acre of fruit than you can from forty acres of grain. Plant now and get in on the high returns.

At this writing, with reconversion on, lots of strikes, labor asking a 30% increase, it is hard to tell what is going to happen within the next six or eight months. However, we still feel we can give you prompt service and have stock arrive as near the date specified as possible. With the war at an end, transportation facilities should be greatly improved by this spring and there should not be any unavoidable delays in getting your shipment to you.

The war is over and the boys are now coming back; we trust your son is among them and has again taken over his place on the farm or in his former job. My son, Bill, is still in the U. S. Air Force, overseas, but I am sure he will be back in time to help us in extending the same personal service always rendered by ACKERMAN in filling your order.

PLACE YOUR ORDER EARLY! We are offering special discounts for all cash orders placed early in the season for we can take care of this work much easier before our shipping season opens up. Our shipping season usually starts the last week in February and continues through March, April, May and June. However, dormant trees and shrubs can be shipped to Southern States earlier. If a specified date is given as to time of shipment, we will try and ship as near that time as possible; if not, will ship at proper planting time for your locality. We feel sure with your cooperation in placing your order early so it may be booked before our rush season is on, we will be able to accommodate all of our customers in a very satisfactory manner.

In most instances, all papers pertaining to your order will be returned to you when order is acknowledged. DO NOT DESTROY THEM. If necessary to write us at any time, be sure and return everything sent to you, including correspondence, original order and tags.

To our new friends who are receiving our catalog for the first time, we want to assure you that your order will be filled with high quality stock and will make you glad you tried ACKERMANS.

Can not  
be Wrong

We have been growers for over fifty years, and have farms with the best of soil, tractors, trucks, packing houses, and everything necessary to grow and pack nursery stock, making the handling charge much cheaper; all of these savings are passed on to our customers—we work on a very small margin of profit.

We also wish to sincerely thank all of our old customers for their continued patronage. As the bulk of our new business comes from unsolicited patrons recommended by our satisfied customers, this shows confidence in The Ackerman Nurseries, on which we base our hope of future business.

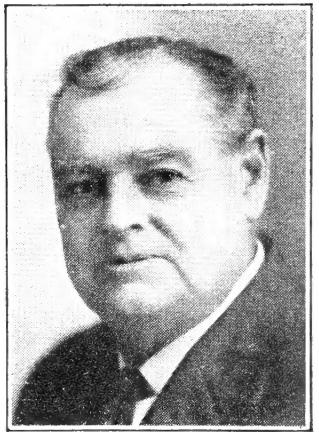

## 3 Generations of Ackermans Have Been Pleasing Their Customers for 55 Years

With this, our 55th Anniversary, it is again my pleasure to extend greetings to each one of you, and to thank our old friends and new customers for their continued good will and patience during the trying times we have just gone through. Now, with the war over, we again pledge the same old-fashioned farmer-to-farmer square deal policies, which 55 years of steady progress has proven to be the only way to do business.

Due to the very favorable growing season we enjoyed this past summer, we have an excellent supply of all small fruit plants. Therefore, prices have been greatly reduced, even though the cost of labor, packing material and everything else is still at the same high level as during the war. Fruit trees are still very scarce, and will be for another year or two, as it takes from two to three years to propagate these trees; due to the serious labor conditions during the war, no one was able to bud as many trees as they did in normal times, and this means there will not be near enough trees to supply the demand—therefore, the big shortage. ## OUR GUARANTEE

We guarantee all of our nursery stock to be just as represented in our catalog; fully up to grade, of good quality, free from disease, and absolutely true to name; also to reach the customer alive, and in perfect growing condition.

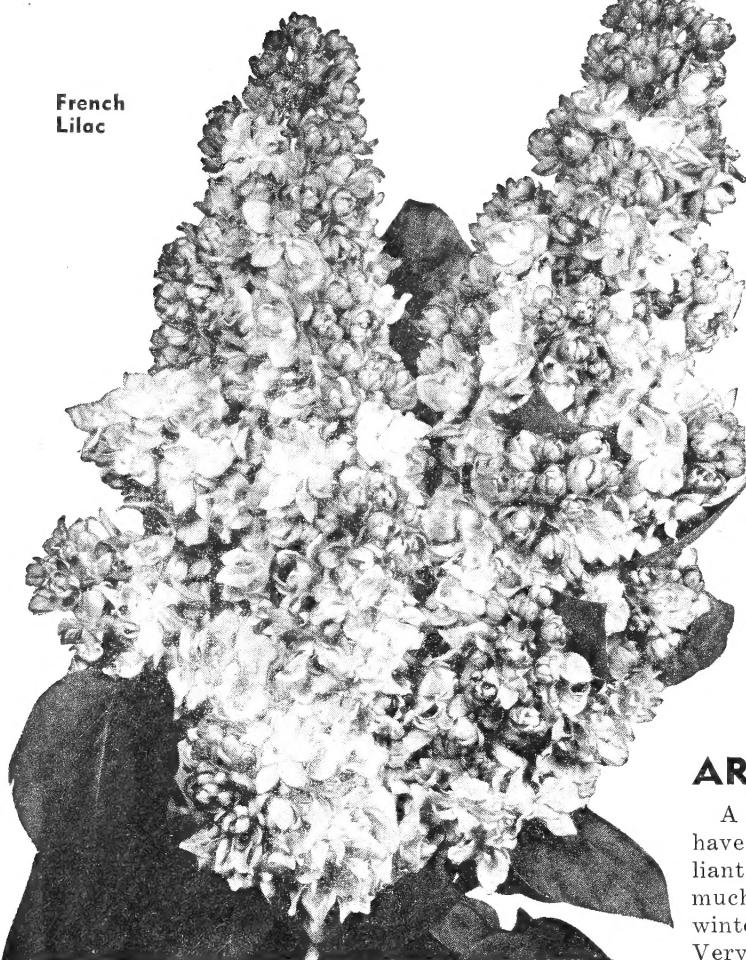

Furthermore, we will, at our option, either replace free of charge, or refund purchase price on any stock that arrives in bad condition, providing claim is made within 10 days after arrival. After 10 days it is mutually agreed that stock is satisfactory. If stock is unsatisfactory on arrival, be sure to get a signed statement from your express agent or postmaster showing extent of damage, and send this along with your claim. Do not return plants unless so instructed by us.

Continued growth depends upon soil, climatic conditions, planting and care—conditions we cannot control—hence is not guaranteed.

It is mutually agreed that in any event we will not be liable for more than the purchase price of the stock. It is understood and agreed between the customer and ourselves that the purchaser's order and our acknowledgment of its receipt, shall constitute a mutual acceptance of the above terms and conditions.

The Department of Agriculture estimates that insects do over a billion dollars' damage a year to our crops, while the value of birds in combating these insects is over 300 million dollars. Besides their value in destroying insects, many species help in keeping down weeds. Offer the birds board and lodging by planting berry producing shrubs, and you will have a host of willing helpers, working tirelessly for you throughout the whole year.

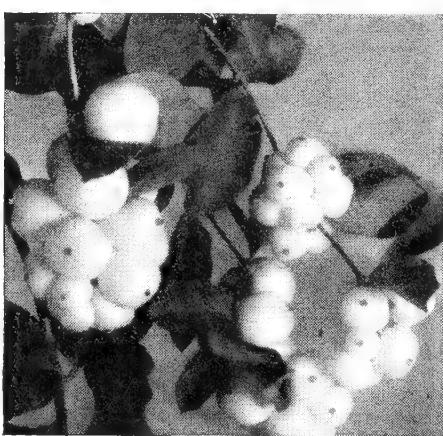

Insect-eating birds flock to farms where a side dish of brilliant shrub and tree berries has been planted.

# CHERRIES

## SOUR CHERRIES

### NEW MONTMAMMOTH SOUR CHERRY

The New Cherry featured on the back cover! Found by Lee McClain, of Knox County, in 1928. High quality cherries are large—often caliper an inch in diameter. As the tree is dwarf and spreading in growth, is much easier to pick than other varieties as the bulk of the crop can be harvested from the ground. Heavy producer—3 to 5 fruits per spur; the parent tree was one-year-old when planted, which was 29 years ago, and it produced a 6-gallon-crate of fruit the third year. We are so favorably impressed with this cherry that we introduced it last year under the name of Montmammoth. The many fine points that this sour Cherry has, we believe, will eventually take the place of all other sour Cherries when stock is available. We offer a one-year-old tree, as follows:

Price: 2-3 ft. trees, \$1.50 each; 3 for \$4.35; 10 for \$14.00.

**Large Montmorency.** The leader of all Sour Cherries. Ripens midsummer. One of the finest flavored Sour Cherries. Bears enormous crops regularly. Best all-around Cherry grown. Tree bears two to three years from planting. The best Sour Cherry for pies and home use.

PRICE:	Each	10	25
2-yr., 9/16 in.....	\$1.50	\$12.50	\$28.75
2-yr., 11/16 in.....	1.85	16.50	37.50

**Richmorency.** (Early Ripening Montmorency.) Large! Extra Early. Ten days earlier than Montmorency. Large red cherries, very juicy, fine flavor. These facts are of decided advantage, as the size, quality, and earliness of this Cherry bring a much larger profit. Should replace all other early Sour Cherries.

Price: 9/16 in., \$1.85 each; 10 for \$16.50.

# ACKERMAN'S Northern Grown

## NEW Tested VARIETIES

There's a Difference. Northern Grown. Buds Especially Selected from Heavy Bearing Trees; Insures a Bumper Crop.

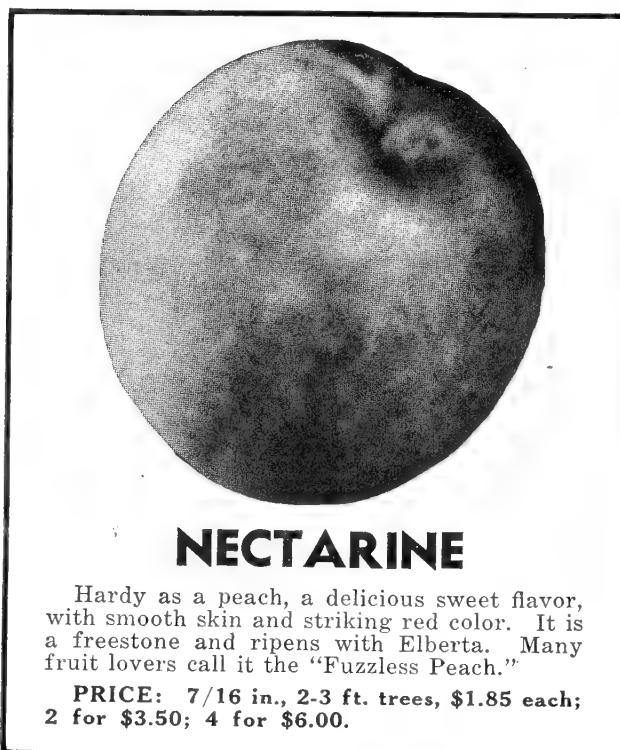

We wish to call special attention to the new varieties listed on this page, which have been tried and tested, and are outstanding either for home use or a commercial proposition. You cannot afford to overlook these new kinds—they are sure money-makers.

**RED ELBERTA.** U. S. Plant Patent No. 232. This rich red-all-over Peach is identical with Elberta in tree and fruit with a much improved flavor, but ripens 10 days earlier. The flavor is exquisitely rich, sweet, and free from all bitterness. It is fine textured, firm and able to hold up for long-distance shipping and canning requirements. The rich red color sells the fruit on sight and demands as high as 75c more per bushel than other Peaches. Discovered in 1928—10 years of fruiting and testing has proven this to be a favorite among the early varieties. **Price:** See page 37.

**AMBER GEM.** This grand new variety is a semi-cling; shaped like an Elberta and ripens same time. Beautiful yellow flesh with deep red blush; delicious honey-sweet flavor. Will hang on the tree from ten days to two weeks after it ripens. Truly one of the largest peaches we have ever seen. One of the best canning varieties known at the present time—used extensively by all canning factories. It is extremely hardy and very productive. Excellent variety for long distance shipping as it will keep several days after being picked. **See page 37 for price.**

**RED HAVEN.** An excellent early maturing peach. RIPENS 30 DAYS EARLIER THAN ELBERTA. Yellow freestone, almost completely covered with a brilliant red color; sweet in flavor. Firm flesh and tough skin. Heavy producer. Fruit buds much harder than Elberta. See page 34 for further description. **See page 37 for prices.**

**SHIPPER'S LATE RED.** An exceptionally good late Peach, beautifully colored red. Flesh is yellow and sweet. Fruit ripens September to October, and clings tenaciously to tree, eliminating droppage. Very hardy; bears young, annually and abundantly. **This variety can only be furnished in 7/16 inch grade.** **See page 37 for price.**

Hardy as a peach, a delicious sweet flavor, with smooth skin and striking red color. It is a freestone and ripens with Elberta. Many fruit lovers call it the "Fuzzless Peach."

**PRICE:** 7/16 in., 2-3 ft. trees, \$1.85 each;  
2 for \$3.50; 4 for \$6.00.

# ASPARAGUS ~

## New Paradise

Save a Full Year—Plant This Spring—Harvest the Following Year!

Very large stalks of exceptionally fine quality; unusually heavy producer. Here we have a better Asparagus that grows a larger crop a FULL YEAR EARLIER, and continues to bear heavier crops year after year. The tender crisp stalks are so large it takes only 6 to 8 to make a pound. Is a very excellent variety for freezing, which is another point in its favor. The far-sighted grower will take this important point into consideration in choosing the variety he will grow; this variety is just as tender, green and fine flavored after freezing as it is a few hours after picking. For the home gardener it is the best possible variety to plant because the same space occupied will produce so much more, and better Asparagus. Paradise Asparagus, like Mary Washington, is highly resistant to rust. With America calling for increased production of all food stuffs, you cannot go wrong in planting this variety, for it will produce larger returns each year and MORE PROFITS IN LESS TIME, and is especially suitable for both canning and freezing under new process.

After a long drawn-out winter, nothing that comes out of the home garden is so much appreciated as the tender stalks and tips of Asparagus. A small bed of them kept weed-free or a border along the garden edge will supply an average table for six weeks or more.

Price: 1-yr., 25 for 85c; 50 for \$1.50; 100 for \$2.75; 250 for \$6.00; 500 for \$10.00; 1,000 for \$16.00.

2-yr., 25 for \$1.65; 50 for \$2.85; 100 for \$4.75; 250 for \$8.50; 500 for \$14.00; 1,000 for \$23.00.

## Mary Washington Asparagus

This variety was developed and introduced by the United States Department of Agriculture. It is rust-proof, early and productive; the heads are solid and compact; stalks often more than an inch in diameter; crisp and delicious. There is no waste with Mary Washington, for every tip is healthy and usable.

## VICTORIA RHUBARB

This new variety has giant size stalks, twice the size of ordinary Rhubarb; very tender. Fine flavor. A trifle later than Myatt's Linnaeus.

## Myatt's Linnaeus Rhubarb

It is an early, tender variety, without being in the least tough or stringy, with a mild, sub-acid flavor. We consider this one of the most profitable market garden crops. We offer good strong roots, at unheard-of low prices.

Entirely thornless! Think of picking real large berries without a chance of scratching your hands! These large, sweet, juicy berries are often 2 inches in length, and are a dark maroon in color. Has a rich tangy flavor all its own. They are just as easy to grow as blackberries—plant 6 feet apart in rows 6 feet across; train on wires the same as dewberries. Absolutely hardy—will not winter-kill. Excellent canner, and valuable for table use, jellies and pies—ideal for freezing. Price: 1-yr., No. 1 plants, 6 for \$1.25; 12 for \$2.10; 25 for \$3.30; 50 for \$5.50; 100 for \$9.50; 200 for \$18.00; 300 for \$26.25; 400 for \$34.00; 1,000 for \$75.00.

The berry is unusually large in size and of superior quality; the clusters are long and filled out to the top, with stems sufficiently long to make picking easy. Berries are a clear light red and the quality excellent. The bush is vigorous, upright, and productive. Ripens early midseason, but holds on over a long period so it can be used or marketed as desired.

**IMPORTANT:** We ship Currant plants only to Michigan, Illinois, Indiana, Kansas, Missouri, Iowa, Nebraska, Oklahoma, North Dakota, South Dakota, Kentucky, Texas, and Colorado.

Price: 1-yr. plants, 30c each; 6 for \$1.55; 12 for \$2.85; 25 for \$5.50; 50 for \$10.00; 100 for \$15.00. 2-yr. plants, 50c each; 6 for \$2.50; 12 for \$4.50.

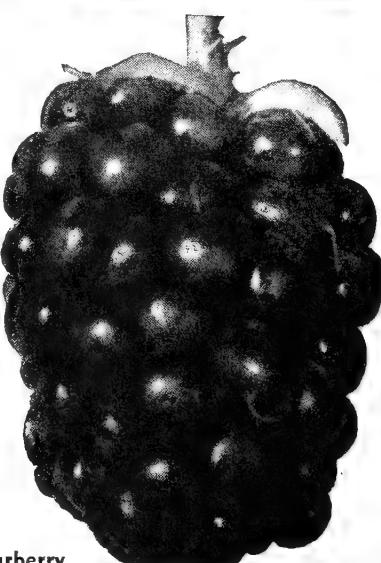

Red Lake Currant

## NECTARBERRY

The Nectarberry is a seedling of the Youngberry. Berries are as large as Boysenberry—larger than Youngberry—and on looks alone might be mistaken for either. Ripens about 3 days later than Boysen, much sweeter, better flavor and much spicier than either Boysen or Youngberry. It has remarkably few and soft seeds and no noticeable core. When eaten either fresh, canned or frozen, the berries retain their fresh fruit flavor. Heavy producer, outyielding both varieties. Has withstood temperatures of 15 to 20 below zero. However, in severe cold sections, substantial mulching is advised; this can easily be done as the vines are always left on the ground until spring. Drought resistant.

Price: 1-yr. plants, 6 for \$1.10; 12 for \$1.90; 25 for \$3.15; 50 for \$5.00; 100 for \$9.00; 250 for \$22.00; 500 for \$42.00; 1,000 for \$75.00.

## **GEM** Two Crops a Year

### The Berry that Really Produces

Plant this spring—pick all summer—you'll get back the price paid for the plants, and **most important, a big profit besides.** You'll harvest another fine crop the following June—two crops in one year. Plants set in May, 1945, on August 15th are producing a wonderful crop of berries which are selling for \$6.50 for a 24-pint crate on our local market. Will produce approximately 100 crates per acre. Then, remember, a big crop on the same plants next June.

Unlike most everbearers, this variety is an excellent plant maker. The plants are very healthy and vigorous, producing an abundance of runners, which bear fruit the first season. The berries are large, bright red, firm, roundish in shape, rather tart but of good flavor and quality. Good for dessert or culinary uses. Very attractive in appearance and sell well on the fresh fruit markets. Our original stock was secured direct from the originator. Price: 25 for \$1.25; 50 for \$2.00; 100 for \$3.50; 250 for \$6.75; 500 for \$11.50; 1,000 for \$22.00; 2,000 for \$40.00.

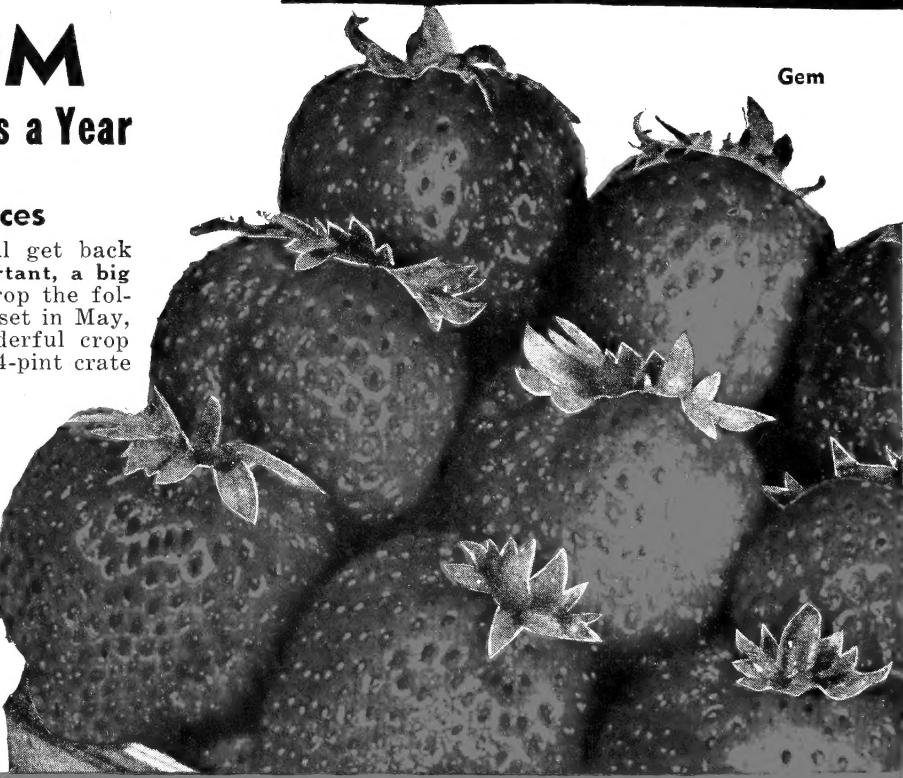

### Ripe Strawberries **90 days after planting**

There is only one true Mastodon—the introducer's original strain—we have it! Plants hardy and productive, producing runners freely for an everbearing variety. Berries large to very large, round, conic in shape, dark scarlet in color; flesh firm, excellent flavor. One of the largest, uniform size from beginning to end of season. Fruit continuously until freezing weather; bear full crop next spring after planting.

**Price:** 1-Yr. plants, 25 for \$1.50; 50 for \$2.50; 100 for \$3.75; 250 for \$8.75; 500 for \$16.00; 1,000 for \$30.00.

**Strong Clumps,** 6 for 75c; 12 for \$1.35; 25 for \$2.50.

*As weather conditions govern the digging of all strawberry plants, these will be shipped separate in most cases. Therefore, do not become alarmed if the balance of your order does not accompany—this will be shipped later, or vice versa.*

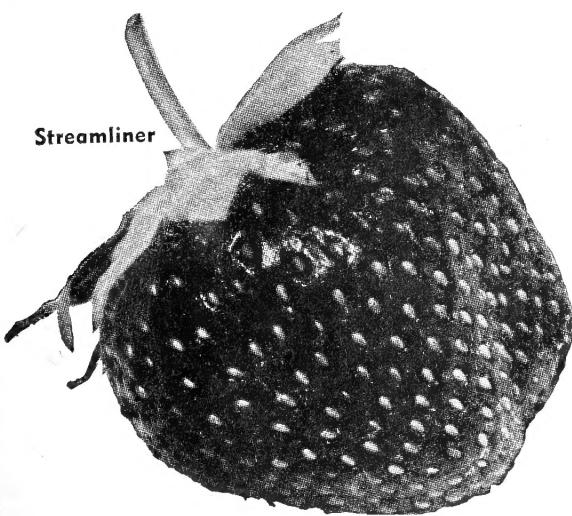

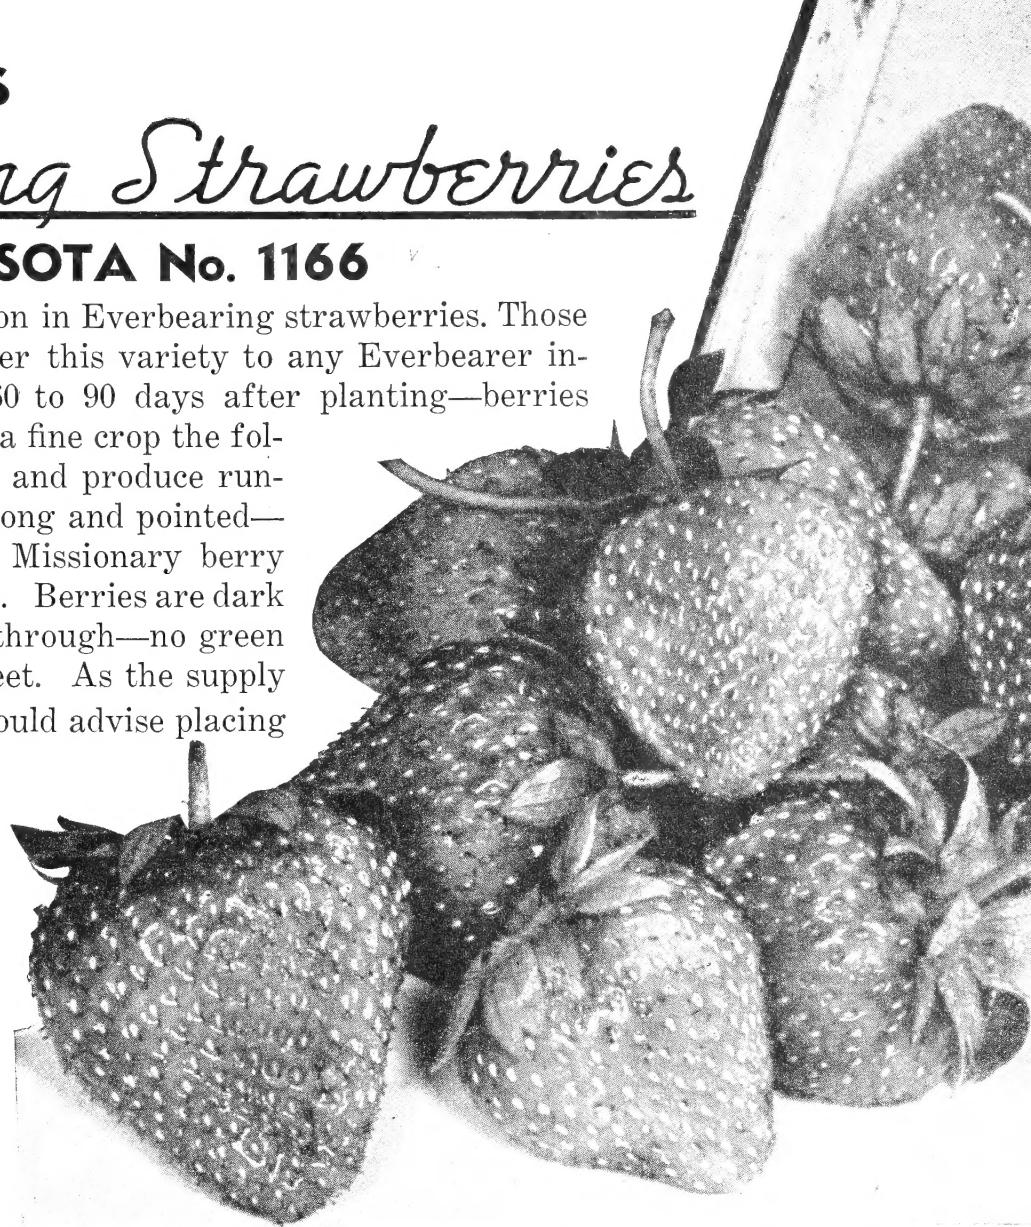

## NEW VARIETIES

# Everbearing Strawberries

### MINNESOTA No. 1166

This is a very recent introduction in Everbearing strawberries. Those who have tried it state they prefer this variety to any Everbearer introduced to date. It also bears 60 to 90 days after planting—berries all summer and fall, followed by a fine crop the following June. Plants are hardy, and produce runners freely. Berries are large, long and pointed—in appearance it looks like the Missionary berry that is so well known in the South. Berries are dark in color and perfectly red clear through—no green tips. Fruit is firm and very sweet. As the supply of this variety is very limited, would advise placing your order early so as to avoid disappointment. Price: 25 for \$1.75; 50 for \$2.85; 100 for \$3.75; 250 for \$8.75; 500 for \$16.00; 1,000 for \$30.00.

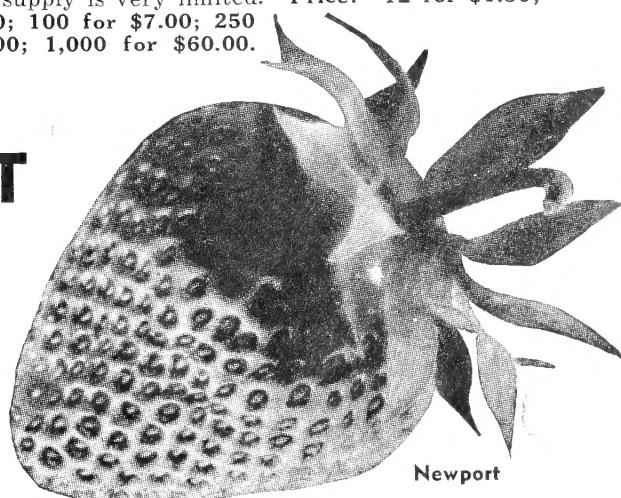

### New! STREAMLINER

A new Everbearer that has everything! Enormous size, beautiful coloring, good flavor, excellent shipping qualities and a good producer. It is claimed to be the largest berry of all the Everbearers; berries are almost round, glistening scarlet color and are sweet as honey-full strawberry flavor. No green tips, for it ripens into a beautiful, rich red all at one time. Its firm qualities make this an excellent shipper. A wonderful variety for canning, and excellent for freezing. Bears 60 to 90 days after planting, and a fine crop the following June. A sturdy plant with luxurious green foliage. An excellent companion for the Minnesota No. 1166. Order early as our supply is very limited. Price: 12 for \$1.50; 25 for \$2.50; 50 for \$4.00; 100 for \$7.00; 250 for \$16.50; 500 for \$31.00; 1,000 for \$60.00.

### NEWPORT

A good June-bearing strawberry which we offered for the first time last year, although it has been grown around Holland, Michigan, for the past eight years; the commercial growers like it much better than many other varieties grown there. Ripens midseason to late. Berry resembles the Catskill, very large in size, has a wonderful flavor—fine for home use and also one of the best for canning. Plants are very thrifty, and will make a matted row where other varieties fail. The supply of plants is so small, unless you order early, you will be disappointed, for we will not have enough to go half way around. Price: 25 for \$1.10; 50 for \$1.85; 100 for \$2.85; 250 for \$6.15; 500 for \$9.00; 1,000 for \$17.00.

# Tried and Tested FOR 45 YEARS SENATOR DUNLAP

One of the oldest and best varieties—a variety your Grandmother canned when you were a child. New varieties have come and gone, but the old Standby "Dunlap" is still with us. Have been sold for 45 years, and still outsells other varieties—they must be good! We sell more plants of this variety than any other kind. Will grow on any kind of soil—grown in every State in the Union—better known than any other variety. Originated by Dr. J. R. Reasoner, of Urbana, Ill.

The fruit is medium large, conical in form, regular in size, and never misshapen; dark glossy red in color. Excellent for home use. The best color—the best flavor, and best of all—so sweet it requires but very little sugar.

Plants are unusually healthy and vigorous, adapting itself to any soil or climate. Our propagating plants have been especially selected from heavy producing patches, making this strain heavy producers. Easiest plant to grow—practically no failure. Still grown extensively for a commercial proposition.

A garden is not complete without a few hundred Dunlap.
